Summary

I'm Lucas, a full-stack developer who likes to work at the crossroads of technology, marketing and design. With a data-driven mindset, I'm looking for a growth position with strong challenges.
Open to all opportunities — even the most atypical.

Education

California State University of Long Beach

Exchange year (2021 - 2022)

Epitech

MS Computer science (2017 - 2023)
Concentration in web applications, interactions and low-level technologies.
Vice president of the student office. Organization of workshops in companies.
Participation in school exhibitions and speaker in events.

Experience

Deux.io Growth engineer (Sept 2020 to Jun 2021)

I built complex lead generation workflows. Automation of marketing and administratives processes. Data-driven outreach campaigns & experiments.

Scale Dynamics Full-stack developer (May 2020 to Aug 2020)

Creation of a cross-platform product (web, desktop and mobile).
UX, performance and accessibility challenges. Internship.

Asheal Co-founder (Sept 2019 to July 2020)

Medtech startup, a medical terminal of pre-diagnosis in waiting rooms.
Branding, product/market fit, PR & UX research. Company still active.

SII Full-stack developer (July 2018 to Dec 2018)

Built a visual dashboard for scrum teams. Agile project management.
Used Vue, Node, Express and Mongo. Internship.
