Summary

I'm Lucas, a full-stack developer focused on making meaningful interfaces and experiences. Blockchain and AI enthusiast.
Open to all opportunities — even the most atypicals.

Experience

MACAS Studio Co-founder / CTO (Jun 21 - Today)

Ecommerce software studio. We conceived scalable systems that can handle the load of thousands of stores. I collaborated with foreign developers on opposite timezones. Featured on Shopify.

Deux.io Growth engineer (Sept 20 - Jun 21)

I built complex lead generation workflows. Automation of marketing and administratives processes. Data-driven outreach campaigns & experiments.

Scale Dynamics Full-stack developer (May 20 - Aug 20)

Creation of a cross-platform product (web, desktop and mobile).
UX, performance and accessibility challenges. Internship.

Asheal Co-founder (Sept 19 - July 20)

Medtech startup, a medical terminal of pre-diagnosis in waiting rooms.
Branding, product/market fit, PR & UX research. Company still active.

SII Full-stack developer (July 18 - Dec 18)

Built a visual dashboard for scrum teams. Agile project management.
Used Vue, Node, Express and Mongo. Internship.

Education

California State University of Long Beach

Exchange year (Oct 21 - Jun 22)

Cybersecurity, DB management & international business.

Epitech

MS Computer science (Sept 17 - Jul 23)

Concentration in web applications, interactions and low-level technologies.
Vice president of the student office. Organization of workshops in companies.
Participation in school exhibitions and speaker in events.
